DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 1 and 5 are the inclusions of a printing method and a printing apparatus comprising the step of determining a printing condition so that printing is performed with use of first and second printing material, when a one-side printing mode is selected and determining a printing condition so that printing is performed with use of the second material but without use of the first material when a two-side printing mode is selected, wherein the first and the second material are of a same color and the second material has a higher density than the first material. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.
- The primary reasons for allowance for claims 2-4 and 6-8 are the inclusions of a printing method and a printing apparatus comprising the step of generating printing data so that a first printing material is used at smaller amount and the second printing material is used at greater amount when a two-side printing mode is set, in comparison with when a one-side printing mode is set. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Uchida (US 2004/0095406) teaches a printing apparatus that variably sets a length of time between an end of recording on a first recording side and a start of recording on a second recording side of a recording medium according to printing data
- Kamei et al. (6,578,944) teach a one-side and two-side printing modes, wherein each mode calls on a different set dot number, respectively
- Walker et al. (6,557,965) teach a duplex printing mode and different types of printing media
